

I firmly believe that it would be ultimately detrimental to our democracy to further the monopolization of our airwaves. We the people need to maintain our ability to obtain unfettered information from as many independent sources as possible. It would be a great tragedy to wake one morning and find that all information was controlled and censored; providing only information approved by the "Parent" company(s) of the broadcasting network(s) without the intent to provide a service to the community, but rather to increase the revenues of said company and their interests through propaganda. Please do not let this become a reality; do not let lobbyists control the destiny of our democracy.
